

48-core optical fiber distribution box reel

Overview

The 48 Core fiber distribution box features a two-panel flip-up design, providing a separate working area for effortless management by the installer. Efficiently manage and distribute up to 48 fiber optic connections with the robust, weatherproof SJ ODB M12 fiber distribution box, ideal for telecommunications, data centers, and versatile network applications. It is mainly used for cable inlet, grounding and fixing and the splicing between the terminal end and pigtail. Optical cables can be lead in/out from upsite or downsite. Adapters plate is selectable and splicing tray is removable and suitable for field operation and maintenance of up to 24 splices (heat. The ODF indoor wall mount fiber optic enclosure is designed to provide a distribution point to feed a high capacity of fiber optic cables to other closets or zones. It can support patching for up to 48x SC fiber optic connections. The enclosure has a swing-out 2 door with a padded lock and key for. Optical Distribution Frame (ODF) is a device used in fiber-optic telecommunications networks to connect, manage and distribute optical fibers from incoming and outgoing cables. 25Gbps and 80km transmission distance with SMF. The 56EYAx series high-power optical amplifier is a high-power multi-port output fiber amplifier with a gain spectrum bandwidth of 1535~1565nm.
