

8-position household electrical distribution box

AI Overview

An 8-position household electrical distribution box is designed to safely organize and distribute electricity across up to eight circuits, suitable for indoor or outdoor residential use.

Overview An 8-position distribution box, also called an 8-way or 8-space breaker box, is used to manage multiple electrical circuits in a home or small commercial setup. It provides a centralized location for circuit breakers, fuses, or disconnectors, ensuring safety, organization, and easy maintenance. These boxes can be modular, waterproof, or standard indoor panels depending on the installation environment.

Key Features

- Circuit Capacity:** Supports up to 8 circuits in a single-row layout, with separate rows for neutral and ground connections.
- Material:** Commonly made from ABS/PC plastic or metal, offering durability and resistance to dust, water, and impact.
- Protection Rating:** Some models, like the HT-8, are IP65 rated, making them suitable for outdoor or harsh environments.
- Design:** Options include side-opening hinged covers for easy inspection, lockable buckles for security, and multiple knockouts for flexible cable entry.
- Compatibility:** Can integrate with fuses, surge protection devices (SPD), disconnectors, or breakers, depending on the system requirements.

Types and Applications

- Indoor Breaker Boxes:** Standard 8-space panels for residential use, often flush-mounted with a main lug and ground bar, ideal for typical household circuits.
- Waterproof/Outdoor Boxes:** IP65-rated boxes like the HT-8, suitable for outdoor installations, PV combiner setups, or areas exposed to moisture.
- Modular Distribution Boxes:** Compact, organized solutions like the MS2208, designed for both residential and commercial applications, emphasizing neat wiring and long-term durability.
- Passive Junction Boxes:** Used for sensor or data distribution without external power, such as the MURRELEKTRONIK EXACT8, mainly in industrial or auto...
