

ASEAN Mobile Terminal Box

AI Overview

The ASEAN mobile terminal market, including mobile POS (mPOS) systems, is rapidly expanding due to digital payment adoption, mobile wallet growth, and regional infrastructure improvements. Market Overview The Southeast Asia POS terminal market was valued at USD 4.96 billion in 2025 and is projected to grow to USD 11.8 billion by 2031, at a CAGR of 15.55%. Mobile and portable POS systems accounted for 46.25% of the market in 2025 and are expected to grow at a 16.7% CAGR through 2031, driven by the increasing use of QR codes, NFC, and hybrid payment devices that consolidate multiple payment methods into a single terminal. Contactless payments dominate, capturing 56.97% revenue share in 2025 and growing at 17.05% CAGR. Drivers of Growth Digital Payment Adoption: Consumers in ASEAN are rapidly migrating to mobile wallets and contactless payments, prompting merchants to adopt mobile terminals for convenience and efficiency. Cloud-Based Solutions: mPOS terminals increasingly integrate cloud services for inventory, CRM, and analytics, enhancing operational efficiency for small and medium businesses. Government Initiatives: Regional programs like the ASEAN Regional Payment Connectivity facilitate cross-border payment standardization, accelerating certification and adoption of mobile terminals. Technological Advancements: NFC, QR code integration, and hybrid devices allow merchants to reduce counter clutter while future-proofing payment acceptance. Regional Infrastructure and Ports ASEAN's extensive archipelagic geography, spanning over 24,000 islands, has prompted investments in modern ports and terminals to support trade and logistics. Countries like Indonesia, Thailand, Singapore, Malaysia, Vietnam, and the Philippines are upgrading or building new port facilities, including smart and green ports, which indirectly support mobile terminal deployment by improving supply chain efficiency and connectivity. Port operators like Asian Terminals Inc. (Philippines) provide inte...
