

Armenia uses distribution boxes

Overview

The electricity sector in Armenia generates, transmits, and distributes electric power to meet domestic demand of around 8 TWh annually, with production dominated by nuclear energy from the Metsamor Nuclear Power Plant (approximately 30-31%), natural gas-fired thermal plants. The electricity sector in Armenia generates, transmits, and distributes electric power to meet domestic demand of around 8 TWh annually, with production dominated by nuclear energy from the Metsamor Nuclear Power Plant (approximately 30-31%), natural gas-fired thermal plants. Armenia's domestic distribution channels are adequate for the country's small size, population, and market. The main storage facilities and wholesale companies are based in Yerevan, the hub for domestic distribution. Distribution most commonly takes place via truck. Domestic distribution via rail. The electricity sector of Armenia includes several companies engaged in electricity generation and distribution. 4 It is responsible for the transmission of electricity from generators to the distribution network, as well as for cross-border transmissions. Economic activities are prohibited in.
