

Cable tray hangers and mounting brackets

AI Overview

Cable tray hanger brackets are specialized supports used to secure cable trays to walls, ceilings, or beams, ensuring proper load distribution and alignment. Types of Cable Tray Brackets

1. **Stand-Off Brackets:** These brackets mount cable trays at a specific distance from walls or surfaces, providing clearance for airflow and maintenance. They are typically made from 2mm thick ribbed steel and can be hot-dipped galvanized for corrosion resistance. Sizes range from 50mm to 300mm depending on tray width and installation requirements.
2. **G Hanger Overhead Support Brackets:** Designed for overhead mounting of cable trays, trunking, or baskets. They are available in sizes such as 100mm, 150mm, and 225mm, made from pre-galvanized or stainless steel, and feature multiple top support holes for secure attachment.
3. **Trapeze Support Brackets:** Pre-assembled for quick installation, trapeze brackets support cable trays with various widths and drop lengths. They are ideal for heavy-duty applications and can be suspended from ceilings or beams.
4. **Single Hanger Brackets:** Used for overhead or beam mounting, these brackets include a threaded rod and nuts for adjustable height. They are typically made from ¼" thick aluminum and can support loads up to 50 lbs.
5. **Spider Brackets:** Specifically for wire mesh cable trays, these powder-coated metal brackets allow wall or floor mounting and snap into the tray for secure support.

Materials and Finishes Cable tray brackets are commonly made from:

- Steel:** Pre-galvanized or hot-dipped for corrosion resistance.
- Stainless Steel (A316/A4):** For high corrosion resistance in industrial or outdoor environments.
- Aluminum:** Lightweight options for moderate loads.
- Glass-Fiber Reinforced Polyester (GRP):** For chemical resistance and non-conductive applications.

Installation Guidelines Support Spacing: Brackets should be installed so that splice j...
