

Cable tray turning into a horizontal bend

Overview

A ladder type cable tray horizontal bend is a fitting designed to facilitate a smooth 90-degree change in the horizontal direction of a ladder cable tray system. This accessory is essential for routing cables around corners while maintaining their organization and structural support. Users can achieve design flexibility with numerous sizes of horizontal and vertical elbows, adjustable elbows, cross pieces, tees, reducers, and branches. Atkore customer service experts can help customers select the right fittings for specific applications.
