

China Tower Corporation as a telecommunications company

AI Overview

Yes, China Tower Corporation is part of the telecommunications sector, specializing in telecommunications tower infrastructure and related services. China Tower Corporation Limited is a state-owned enterprise primarily engaged in the construction, maintenance, and operation of telecommunications towers and base station supporting facilities across mainland China (WebPages). The company provides services such as public network coverage for high-speed railways and subways, large-scale indoor Distributed Antenna Systems (DAS), and energy application services like intelligent battery exchange and power backup (WebPages). Founded in July 2014 through the merger of the tower businesses of China Mobile, China Unicom, and China Telecom, China Tower serves these major telecom operators as both a customer and shareholder, highlighting its integral role in China's telecommunications infrastructure (WebPages). The company operates over 2 million tower sites and provides services to millions of tenants, making it the world's largest telecommunications tower infrastructure service provider (WebPages). China Tower's business segments include the Tower Business (macro and small cell sites), DAS Business (indoor distributed antenna systems), and Trans-sector Site Application and Information (TSSAI) Business, which supports infrastructure and maintenance services for various industries (WebPages). Its operations are central to the deployment of mobile communication networks, including 5G infrastructure, confirming its classification within the telecommunications sector (WebPages). In summary, China Tower Corporation is a core player in the telecommunications sector, providing essential infrastructure and services that enable mobile network coverage and connectivity throughout China.
