

A 12-circuit distribution box is an electrical enclosure designed to safely house up to twelve circuit breakers or modular protection devices, providing organized power distribution for residential, commercial, or light industrial installations. Types and Materials 12-way distribution boxes are available in metal or ABS plastic constructions. Metal boxes, often made from CRCA sheet steel with a powder-coated finish, offer durability, corrosion resistance, and a sleek appearance, suitable for indoor installations. Plastic boxes, typically ABS, provide IP65 waterproofing, making them suitable for both indoor and outdoor use, protecting circuits from rain, snow, and dust. Features Circuit Accommodation: Designed to hold up to 12 Miniature Circuit Breakers (MCBs) or RCBs, with modular DIN rail mounting for easy installation. Safety: Insulated terminals, shock-proof construction, proper earthing, and transparent or opaque covers allow monitoring without opening the box. IP Rating: Plastic boxes often have IP65 protection, while metal boxes may have IP41, providing basic protection against dust and water splashes. Dimensions: Typical sizes range from 255 x 200 x 110 mm for plastic boxes to 375 x 230 x 91 mm for metal enclosures. Installation: Options include surface-mounted or flush-mounted configurations, depending on wall type and aesthetic preference. Electrical Specifications Rated Current: Many 12-way boxes support up to 100A main bars. Voltage and Frequency: Standard operational voltage is 240V with 50-60Hz frequency. Wiring Compatibility: Screw-type connections accommodate solid or flexible copper cables, typically ranging from 1 mm² to 16 mm² for neutral and earth connections. Applications 12-circuit distribution boxes are widely used in: Residential apartments and homes Commercial buildings and small offices Workshops, hotels, and shopping malls Light industrial facilities and power stations Standards and Compliance High-quality distribution boxes comply with IEC 61439-3 and other elect...
