

Eastern Europe Vertical Shaft Smart Building Fiber Optic Cable Price Inquiry

AI Overview

Fiber optic cables for vertical shaft smart building applications in Eastern Europe are available from multiple regional manufacturers, with prices depending on type, fire rating, and quantity. Cable Types and Fire Ratings For vertical shafts in smart buildings, riser-rated indoor cables (OFNR) are commonly used, providing fire resistance between floors. For air-handling spaces, plenum-rated cables (OFNP) are required due to stricter fire and smoke standards. European projects often require CPR-rated cables, with classifications like Cca for standard commercial buildings and B2ca for high-risk environments such as hospitals or airports. These ratings also account for smoke, flaming droplets, and acidity, ensuring safety in fire events. LSZH jackets are preferred for low smoke and halogen-free properties, especially in confined spaces or data centers. Regional Manufacturers and Suppliers Cimler Ltd. (Bulgaria): Offers a wide range of indoor and outdoor fiber optic cables, including flat drop, self-supported, armored, and flexible models suitable for industrial, telecom, and FTTH applications. Their production emphasizes reliability and compliance with international standards. ETK Kablo (Turkey, exporting to Eastern Europe): Produces single-mode and multimode cables up to 576 cores, including tight-buffered, loose-tube, armored, indoor/outdoor, flame-retardant, and fire-resistant variants. They provide tailored solutions for smart building projects and comply with IEC and EN standards. ScaleFibre Europe: Offers the SlimCORE™ range with OFNR and OFNP ratings, suitable for vertical shafts and plenum spaces, with LSZH and CPR options for European standards. Mouser Europe: Distributor of fiber optic cables from multiple manufacturers, providing datasheets, inventory, and pricing per unit based on quantity. Wholesale suppliers: Platforms like go4WorldBusiness list European suppli...
