

Energy Interconnection in Panama

Overview

Panama and Colombia have entered a decisive phase in their energy interconnection project, strengthening regional energy infrastructure and promoting energy cooperation between the two nations. This initiative also supports sustainable development and integration of renewable energy sources. (3) Population & Demographic Indicators 2022, UNDESA, 2022. (4) OLADE Population, Energy Hub, IDB. The Panama Canal Authority has recently unveiled its plans to build a massive pipeline to transfer essential gas and energy resources to the world. The government has also aligned its targets with the Paris Agreement. Panama's electricity landscape is entering a new phase of modernisation with a landmark \$300 million framework loan agreed between the EIB Global, the international partnerships and development arm of the European Investment Bank, and Naturgy Energy Group through its Panamanian distributors EDEMET.
