

Function of the bundled pigtail fiber thermal stripper

Overview

Rechargeable clamping thermal stripper can simultaneously strip multiple fibers, significantly improving work productivity. The widened precision-aligned blades ensure clean stripping with no residue left behind. For purchasing, use the RP Photonics Buyer's Guide for fiber strippers. It provides an expert-curated supplier directory, buyer-focused technical background information, and structured selection criteria to support professional procurement decisions. The centralizing features of the replaceable blades position the optical fiber to both prevent contact of the blades with the fiber cladding and sufficiently remove the fiber. The Ribbon & Bundle Fiber Clamping Thermal Stripper, Rechargeable is a cutting-edge tool designed to enhance efficiency, precision, and portability in fiber preparation.
