

How much does a fiber optic connector cost in Cambodia

AI Overview

Fiber optic transceiver connectors in Cambodia typically range from \$10 to \$500 per unit, depending on type, brand, and performance.

Price Overview The cost of fiber optic transceivers varies widely based on brand, technology, and performance. Basic 1G SFP modules, especially compatible third-party units, can cost \$5–\$25, while OEM-branded modules from Cisco, HPE, or Juniper may range from \$60–\$120 for standard 1G SFPs. Higher-speed modules, such as 10G SFP+ for short-range connections, often sell for \$10–\$100, whereas long-range or specialized modules (LR, ER, DWDM) can reach \$200–\$500 or more. Ultra-high-speed transceivers for metro or long-haul networks may exceed \$2,000 per unit.

Factors Affecting Price

Brand and Warranty: Branded modules include guaranteed compatibility, support, and certifications, which increase cost.

Technology and Performance: Modules supporting longer distances, higher speeds, or advanced error correction are more expensive.

Type of Fiber: Single-mode modules generally cost more than multimode for long-distance applications.

Third-Party vs OEM: Compatible third-party modules can reduce costs by 50–90% compared to OEM units.

Local Considerations in Cambodia While exact local prices are not listed, Cambodian buyers typically import modules from regional distributors or online marketplaces. Additional costs may include shipping, import duties, and taxes, which can slightly increase the final price. Bulk orders may qualify for discounts, and some suppliers offer 5–10% off for orders of 10+ units.

Practical Advice For short-range enterprise links, low-cost compatible SFPs are often sufficient. For critical or long-distance connections, investing in OEM-branded or high-performance modules ensures reliability. Always check local distributors in Phnom Penh or online regional suppliers for current pricing and availability. In summary, ex...
