

How much does a primary main distribution box cost

Overview

New panel box pricing typically ranges from about \$150 to \$1,900 for parts and labor, with most residential projects landing between \$450 and \$1,500 depending on amp rating, gauge of wiring, and labor complexity. These critical components house circuit breakers, fuses, and protective devices that safeguard electrical systems from overloads and short circuits. The cost of a new panel box depends on the box size, meter/branch requirements, enclosure type, and labor for installation. You might find a small plastic unit for the price of a fancy dinner, or an industrial-grade stainless steel beast that costs as much as a compact car. From residential 100-amp panels to massive 600 amp main distribution panels in commercial facilities, this comprehensive guide will help you understand distribution board types, sizing calculations, and installation requirements to make informed decisions about your electrical infrastructure.
