

How to connect the fiber optic cable and pigtail to the fiber distributor box

Overview

Thus, a fiber termination box is used to terminate the optical fiber cables in the field and connect them to the pigtail by splicing. After an optical cable arrives at the user's end, it is fixed in the terminal box. This is exactly why most professional installers have moved away from field-termination and toward splicing. The success of a network in fiber optic cable installation heavily. If you're new to fiber optics or want to enhance your technical skills, this guide will help you understand how to splice fiber pigtails safely and efficiently. --- In This Video You'll Learn: What fiber pigtails are and why they're used How to strip, clean, and prepare fiber cables Using. Follow these steps to connect the fiber optic cables to the fiber termination box: Refer to the fiber termination box's manual to correctly connect the fiber optic cables to it.
