

## How to install a double-door fireproof electrical distribution box

### AI Overview

Install a double-door fireproof distribution box by selecting a safe location, securing the enclosure, applying fireproof inserts or mats, and connecting circuits according to code.

**Step 1: Choose the Installation Location** Select a dry, accessible area with good ventilation, away from water, flammable, or corrosive substances. For residential setups, the recommended height is around 1.5 meters above the floor; for industrial installations, adjust based on surrounding equipment and accessibility. Ensure the location allows future maintenance and expansion, and if outdoors, choose a box with IP66 or NEMA 4 rating for water and dust protection.

**Step 2: Prepare the Tools and Materials** You will need: Screwdrivers, drills, and mounting hardware. Fireproof materials such as firestop putty pads, intumescent box inserts, or endothermic mats. Circuit breakers and wiring according to load requirements. Multimeter for testing connections.

**Step 3: Mount the Distribution Box** Secure the box to a solid wall or stud using appropriate anchors. Ensure the box is level and stable. Leave sufficient space around the box for ventilation and wiring access.

**Step 4: Apply Fireproofing** Place firestop inserts or mats inside the box behind wiring to maintain the wall's fire rating. Use firestop cover plate gaskets behind the faceplate to prevent heat transfer. Ensure all fireproof materials are certified and tested according to ASTM E814 or UL 1479 standards.

**Step 5: Connect Electrical Circuits** Turn off the main power supply before wiring. Connect the incoming live wire to the main terminal. Install circuit breakers in their designated slots and connect each circuit wire securely. Ensure proper grounding and insulation for all connections. Label each circuit for safety and future maintenance.

**Step 6: Test and Inspect** Use a multimeter to verify all connections are secure and there are no short circuits. Perform a visual inspection to ensure firepro...
