

## How to wire the power switch in the distribution box

### AI Overview

To wire a switch in a power distribution box, connect the input power to the main MCB, route through protective devices like RCCB, and then connect the switch to the load while ensuring proper neutral and earth connections.

**Step 1: Safety First** Before starting, turn off the main power supply at the circuit breaker or fuse box. Use a non-contact voltage tester to confirm that no electricity is present in the wires you will work with ( ). Always wear insulated gloves and follow local electrical codes.

**Step 2: Identify Components** A typical distribution box includes:

- Main MCB (Double Pole):** Controls the overall power supply.
- RCCB (Residual Current Circuit Breaker):** Protects against electric shock.
- Single-Pole or Double-Pole MCBs:** Protect individual circuits.
- Neutral and Earth Bars:** For proper grounding and neutral connections ( ).

**Step 3: Connect the Input Power** Connect the phase (live) and neutral wires from the main power supply to the input terminals of the main MCB. Connect the output of the main MCB to the input of the RCCB. Connect the earth wire from the supply to the earth bar in the distribution box ( ).

**Step 4: Wiring the Switch** For a single-pole switch controlling a load: Connect the phase wire from the RCCB output to the input terminal of the switch. Connect the output terminal of the switch to the phase terminal of the load. Connect the neutral wire from the RCCB output to the neutral terminal of the load. Connect the earth wire to the earth bar ( ). For a double-pole switch: Connect both phase and neutral wires from the RCCB output to the switch input. Connect the switch output to the load's phase and neutral terminals. Ensure the earth wire is connected to the earth bar ( ).

**Step 5: Final Checks** Verify all connections are tight and correctly placed. Ensure no bare wires are exposed. Test the switch using a voltage tester before powering the system. Turn on the main MCB and check that the switch contr...
