

Iron grate distribution box

AI Overview

Iron grate distribution boxes are heavy-duty drainage solutions combining cast iron grates with concrete or precast boxes for high water flow and durable installation. Overview Iron grate distribution boxes are designed to manage surface water efficiently in areas with high pedestrian or vehicular traffic. They consist of a precast concrete or heavy-duty concrete box that houses the drainage system, topped with a cast iron grate that allows water to flow through while providing a sturdy, weather-resistant surface. These systems are commonly used in municipal, commercial, and residential drainage projects. Key Features Material: Grates are made from heavy-duty cast iron, resistant to cracking, weathering, and high traffic loads. Boxes are typically precast concrete for durability. Design: Grates are slotted or patterned to allow water to drain efficiently. Some grates, like the 16" bicycle pattern, are designed for specific applications. Sizes: Available in multiple sizes, including 6", 8", 10", 12", 16", 18", and 24" to fit various drainage needs. Compatibility: Grates are tapered for easy installation and removal, fitting securely with frames or precast boxes. Frames can be wet-set into concrete to create custom water storage basins. Durability: Cast iron grates provide long-term service in high-flow areas, outperforming plastic alternatives in strength and longevity. Applications Stormwater management: Collecting and directing rainwater in streets, parking lots, and landscaped areas. Utility access: Serving as junction points for underground piping systems. Pedestrian and bicycle areas: Special patterns and heavy-duty frames ensure safety and functionality in public spaces. Suppliers and Options Wildcat Drainage: Offers a full line of cast iron grates and concrete drain boxes with multiple sizes and patterns, suitable for new installations or replacements. Roman Stone: Provides NYC-spec cast iron covers, frames, and grates, including custom options for municipal and DOT projects. Yorktown Garden Supply: Supplies...
