

Is it okay for the electrical distribution box to block the balcony

Overview

Placing a breaker box outside is permissible, provided the installation adheres to national electrical codes. The receptacle is no longer required to be located physically within the perimeter. This enclosure houses the main disconnect and individual circuit breakers that distribute power safely. Breakers automatically interrupt the flow of electricity during an overload or short. Understand the legalities and key considerations before covering utility boxes on your property to ensure safety and compliance. Below is a comprehensive guide to NEC rules for outdoor receptacles, lighting, conduit, boxes, pool zones, and more. I don't know how one might build a balcony that isn't attached to the building but I imagine there was, at some point, someone who built a porch that was detached?
