

Lithuanian Vibration Optical Cable Manufacturer

AI Overview

Fiber Optic Devices (FOD) and Skaidula are leading Lithuanian companies capable of producing custom fiber optic cables, including vibration-resistant designs. Fiber Optic Devices (FOD), located in Vilnius, Lithuania, is a full-service fiber optic technology company offering custom fiber optic components and cables for OEM and end-user markets. They specialize in designing and manufacturing solutions that meet precise optical specifications, including vibration-resistant and high-performance applications. FOD invests heavily in R&D to create innovative, high-quality fiber optic products compliant with international standards such as RoHS and REACH, making them a reliable partner for custom optical cable projects. Skaidula, established in 1989, is another prominent Lithuanian company in the fiber optic sector. They produce high-quality fiber optic connectors and cables, and have experience in custom solutions for telecommunications and industrial applications. Skaidula's expertise includes assembling complex voice, video, and data networks, and they have historically collaborated with major international brands like Siemens and FUJIKURA. Their focus on innovation and advanced technological deployment makes them suitable for custom vibration-resistant optical cable manufacturing. Other Relevant Companies Workshop of Photonics (WOP): Specializes in ultra-high precision fiber processing and custom-shaped tip fibers, which can be integrated into specialized optical cable systems. EKSMA Optics: Offers precision optical components and electro-optical modulators, which may complement custom fiber optic cable systems requiring advanced optical performance. Summary For custom-made vibration optical cables in Lithuania, FOD and Skaidula are the most directly relevant manufacturers, offering both design flexibility and high-quality production capabilities.
