

Malaysia Fiber Optic Communication Project

Overview

In a bold move to bolster digital resilience, Malaysia has embarked on a transformative initiative to lay fibre optic cables along its 1,600-kilometer North-South railway corridor, stretching from Padang Besar in the north to Johor Bahru in the south, and extending to Tumpat in. In a bold move to bolster digital resilience, Malaysia has embarked on a transformative initiative to lay fibre optic cables along its 1,600-kilometer North-South railway corridor, stretching from Padang Besar in the north to Johor Bahru in the south, and extending to Tumpat in. In a bold move to bolster digital resilience, Malaysia has embarked on a transformative initiative to lay fibre optic cables along its 1,600-kilometer North-South railway corridor, stretching from Padang Besar in the north to Johor Bahru in the south, and extending to Tumpat in Kelantan. This. YTL Communications Sdn Bhd has been selected by the Railway Asset Corporation (RAC) to develop fibre optic infrastructure along 1,600 kilometres of Malaysia's railway tracks. Transport Minister Anthony Loke Siew Fook said this initiative is part of efforts to strengthen the nation's digital. Unusual volume today measures how much trading activity exceeds a stock's normal daily level, based on its average trading volume over the past 200 days. This is reported by the railway transport news portal Railway Supply.
