

Micro-module upgraded version

Overview

Introduced at MWC 2026, Quectel FGH200M Wi-Fi HaLow module, based on Morse Micro MM8108 SoC, is an upgraded version of the previous MM6108-based FGH100M module designed for long-range, low-power IoT connectivity. This document provides users with the firmware version history of MicroLogic X control unit. With Connected Components Workbench software version 12 or later, and the microSD card plug-in for Micro800 controllers, you can update your Micro830, Micro850, and Micro870 controller from the microSD card and with ControlFLASH. To select a specific product version. Hold the 'Ctrl' key down to select multiple items and then click 'MOVE SELECTIONS' to finalize your selections. Berndt Version Firmware, please open this link to download and view the tutorial. V4 has already received hardware support for this firmware and does not require additional soldering or modification of the motherboard: [de/dvb/pocketSI4735DualCoreDecoder](#).
