

## New EMS Communication Sites

### AI Overview

Several EMS communication platforms and vendors now offer direct sales solutions to enhance first responder coordination and hospital integration. EMS Communication Platforms

1. ERS Wireless ERS Wireless provides advanced EMS communication solutions, including two-way radios, video security systems, and NG911 software. Their CommandCentral CAD system allows dispatchers and first responders to share 360-degree incident information, improving situational awareness and patient care. These solutions are available for direct purchase, enabling EMS teams to integrate reliable communication tools into their operations efficiently.
2. Deltapath EMS Communications Hotline Deltapath offers a real-time EMS communications channel connecting first responders and hospitals. This system allows EMTs and paramedics to provide immediate updates on patient conditions, coordinate care strategies, and share administered medications. Direct sales of this platform enable hospitals and EMS agencies to implement seamless communication workflows, improving operational efficiency and patient outcomes.
3. Elite Marketing Solutions (EMS Direct) EMS Direct focuses on B2B telemarketing, executive virtual assistants, and corporate training to streamline communication and operational processes. While not a traditional EMS hardware provider, their services support EMS organizations in optimizing internal communication, lead generation, and staff efficiency. Direct sales options include tailored consulting, virtual assistant services, and telemarketing teams to enhance operational clarity.

**Considerations for Direct Sales**

- Customization:** Many EMS communication solutions offer modular or scalable options to fit the size and needs of your organization.
- Integration:** Ensure the platform integrates with existing dispatch systems, hospital networks, and public safety equipment.
- Training and Support:** Vendors often provide hands-on coaching, technical support, and process optimization to maximize the effectiveness of the communication system ....
