

Ott Cloud Data Center Interconnection

Overview

This solution allows for dynamic interconnections between cloud DCs and provides cloud service bearer networks that are ultra-broadband, simplified, intelligent, and easy-O&M, which helps customers achieve commercial monetization. A robust and interconnected Datacenter ecosystem, located in cities and strategic areas, with the infrastructure and security that your processes require. It enables us to have conditioned spaces to host the IT infrastructure, providing the electromechanical and environmental conditions required. Over The Top (OTT) enables Internet enterprises to run various video and data services over carrier networks based on the open Internet. With the pressing concerns of the OTT industry in mind, Huawei launches an interconnection solution for cloud DCs. They. The Netflix Open Connect program provides opportunities for ISP partners to improve their customers' Netflix user experience by localizing Netflix traffic and minimizing the delivery of traffic that is served over a transit provider.
