

Ownership of fiber optic cable inside the building

Overview

In most every case under FCC rules Spectrum will own the conduit, and the cable inside of it, up to but not quite to the entry point of your home. My contract is expiring in a couple of weeks so I'm trying to decide what to do. If they installed conduit on my property (underground and up the side of the building), who owns that conduit?

Can I have another telecom company pull their fiber through that conduit?

I'm afraid if I call Spectrum, I. oors; however, some of the Systems are located indoors in a building or other host venue (e., a stadium) (hereinafter referred to collectively as "building"). axpayer enters into agreements with the Tenants pursuant to which Taxpayer grants a Tenant the right to use a System for the Tenant's tel. In this article, I will discuss the best practices and solutions for deploying indoor fiber optic cables in high-rise buildings and tight spaces. Drawing from my extensive experience in the fiber optic communication industry and hands-on work at Aimit Communication (Shenzhen) CO., LTD, I'll provide. FTTB is a fiber optic deployment architecture where high-speed fiber cables extend from an internet service provider's main network directly to the entry point or telecommunications room of a multi-unit building, such as an apartment complex, office building, or shopping center. From this point. Property networks In businesses and homes, traditio-nally has been built with twisted copper cable, LAN cable of the type CAT 5, 6 or 7. Between those two points are a number of stages: Each of these stages breaks down into many smaller projects with one thing in.
