

Price list for electrical distribution boxes at construction sites in Vietnam

AI Overview

Electrical distribution boxes in Vietnam typically range from \$10 to \$500 per unit, depending on size, material, and specifications.

Price Range and Types

- Small plastic junction boxes** (commonly used for light industrial or residential construction) are priced around \$10–\$30 per unit for standard sizes like 4x4 inches, especially when produced locally in Vietnam.
- Medium-sized metal enclosure distribution boxes** for industrial or factory use typically cost \$50–\$200 per unit, depending on material quality (steel, electroplated iron) and voltage rating (220V–380V).
- Large industrial distribution boxes** with higher current capacity (up to 100A or more) and additional control equipment can range from \$300–\$500 per unit, often used in factories, substations, or solar power systems.

Factors Affecting Price

- Material:** Plastic boxes are cheaper, while metal enclosures provide better durability and protection.
- Voltage and Current Rating:** Higher voltage or current capacity increases cost.
- Size and Customization:** Larger boxes or custom designs with additional features (e.g., waterproofing, dust-proofing, or integrated monitoring) are more expensive.

Local Manufacturing vs. Import: Locally manufactured boxes in Vietnam can reduce costs compared to imported units from China or South Korea, which may include shipping and tariffs.

Suppliers and Sourcing

- Local manufacturers:** Companies like Seawin Industrial offer high-volume production of plastic junction boxes with in-house tooling and assembly in Vietnam.
- B2B platforms:** ExportHub and Alibaba list multiple Vietnamese suppliers for metal and plastic distribution boxes, allowing direct sourcing and price negotiation.
- Specialized distributors:** IREX provides certified distribution boxes for industrial and solar applications, ensuring compliance with TCVN and ISO standards.

For construction projects, it is recommended to specify v...
