

Price of House Incoming Electrical Distribution Box

AI Overview

Residential electrical distribution boxes typically range from £1–£450 depending on type, materials, and features.

Typical Price Ranges

- Standard plastic wall boxes: £1–£10 for basic units suitable for simple residential wiring.
- Metal or higher-quality enclosures: £50–£200, offering enhanced durability, corrosion resistance, and capacity for multiple circuits.
- Complete consumer units or fuse boxes: £200–£450, including integrated circuit breakers, surge protection, and compliance with modern safety standards.

Factors Affecting Cost

- Material:** Plastic boxes are cheaper, while powder-coated steel or stainless steel units are more expensive due to durability and fire resistance.
- Capacity and circuits:** Larger boxes that accommodate more circuits or three-phase systems cost more than single-phase units.
- Features:** Smart monitoring, surge protection, modular design, and weatherproofing increase the price.
- Installation:** Professional installation adds to the total cost, especially for complex or wall-mounted units.
- Customization:** Specialized labeling, integration with home automation, or outdoor-rated enclosures can further increase costs.

Summary

For a typical residential home, a basic distribution box can cost as little as £1–£10, while a fully equipped consumer unit with modern safety and monitoring features may cost up to £450. Choosing the right box depends on your home's electrical load, safety requirements, and whether you want advanced features like smart monitoring or surge protection.
