

Price of Multi-layer Cable Tray Supports and Brackets

AI Overview

Multi-layer cable tray installation brackets typically range from \$10 to \$50 per bracket, depending on material, size, and finish. Pricing Overview The cost of cable tray brackets depends on several factors, including material, size, type, and corrosion resistance. Common materials include pre-galvanized steel, hot-dipped galvanized steel, stainless steel (A316/A4), and aluminum, each offering different durability and environmental resistance. Standard wall or stand-off brackets for single or multi-layer cable trays generally cost \$10-\$30 per bracket for steel options with galvanization. Heavy-duty or trapeze support brackets designed for multi-layer installations or wider trays can range from \$25-\$50 per bracket, especially when made from stainless steel or pre-assembled for quick installation. Specialized brackets for overhead or complex configurations, including adjustable or multi-tiered supports, may exceed \$50 per unit, depending on size and load capacity. Factors Affecting Cost Material: Stainless steel brackets are more expensive than galvanized steel due to superior corrosion resistance, ideal for industrial or outdoor environments. Bracket Type: Stand-off, trapeze, and hanger brackets vary in complexity and load capacity, influencing price. Size and Load Capacity: Larger brackets supporting multiple layers or heavier cable loads cost more. Typical widths range from 50mm to 300mm, with drop lengths up to 500mm. Finish and Coating: Hot-dip galvanization or powder coating increases durability and price compared to standard steel. Practical Considerations For multi-layer cable tray installations, it is recommended to select brackets that provide robust support, corrosion resistance, and compliance with EN 61537 standards. Bulk purchases or project-specific kits may reduce per-unit cost. Always consider compatibility with the cable tray system and installation enviro...
