

Price of bus connectors

AI Overview

Bus connector prices vary widely depending on type, current rating, material, and manufacturer, typically ranging from a few dollars to over \$100 per unit.

Overview of Bus Connector Pricing

Bus connectors, including electrical bus bar connectors and data bus connectors, are essential components in power distribution and communication systems. Their prices depend on several factors:

- Type and Application:** Standard bus bar connectors for industrial power systems are generally less expensive than specialized data bus connectors or hybrid connectors with multiple signal and power contacts.
- Current Rating and Material:** Connectors designed for high-current applications or made from copper or silver-plated materials cost more due to enhanced conductivity and durability.
- Brand and Supplier:** Trusted brands like ABB, Eaton, TE Connectivity, and Weidmuller may command higher prices, while generic or bulk connectors can be more affordable.
- Mounting Style and Features:** Plug-in, flexible, or DIN rail-mounted connectors with diagnostic LEDs or hybrid signal/power capabilities are priced higher than simple bolted connectors.

Typical Price Ranges

- Basic bus bar connectors: \$5–\$30 per unit for standard industrial applications.
- High-current or specialized connectors: \$50–\$150 per unit, depending on current rating, material, and additional features.
- Data bus connectors (e.g., MIL-STD-1553B or PROFIBUS): \$10–\$100 per unit, depending on manufacturer and specifications.

Where to Check Prices

- Mouser Electronics:** Offers a wide range of bus bar connectors with inventory, datasheets, and pricing.
- RS Components:** Provides industrial bus bar connectors and grounding products with filtering by current rating, material, and mounting style.
- Farnell UK:** Stocks data bus connectors from top manufacturers with fast quotes and delivery options.
- DirectIndustry and Jointing Tech:** Offer specialized industrial bus connectors, including hybrid and flexible types, with supplier-specific pricing.
