

Price of cable tray elbow and straight connector

AI Overview

Cable tray elbows typically range from \$10 to \$50 each, while straight connectors cost around \$5 to \$20 each, depending on material, size, and brand. Overview Cable tray accessories, including elbows and straight connectors, are essential for routing and joining cable trays in commercial and industrial installations. Elbows allow directional changes in the tray system, while straight connectors join two tray sections in a linear configuration. These components are available in steel, stainless steel, aluminum, or wire mesh, with finishes such as zinc plating or hot-dip galvanization for corrosion resistance. Price Factors Material: Stainless steel and hot-dip galvanized fittings are more expensive than plain steel or aluminum. Size: Larger tray widths and heights increase the cost of connectors and elbows. Duty Rating: Heavy-duty fittings for industrial use cost more than light-duty options. Brand and Supplier: Premium brands like Legrand, Schneider Electric, or Phoenix Contact may charge higher prices. Typical Price Ranges Cable Tray Elbows: \$10–\$50 each, depending on size and material. Straight Connectors: \$5–\$20 each, depending on size and material. Specialty or heavy-duty fittings: Can exceed \$60 per piece for large industrial trays. Additional Considerations Some suppliers offer kits or clamp connectors that can join trays after bending, which may slightly increase cost but improve installation flexibility. Prices may vary by region and supplier, so checking local distributors or online catalogs is recommended for exact quotes. By considering these factors, you can estimate the total cost for your cable tray installation and select the appropriate fittings for your project.
