

Price of ladder-type horizontal four-way cable tray

AI Overview

The price of a ladder-type horizontal four-way cable tray typically ranges from \$50 to \$150 per unit, depending on material, size, and supplier.

Overview Ladder-type cable trays are designed with side rails and rungs to support and route electrical cables, allowing for airflow and easy cable entry or exit. Horizontal four-way fittings (also called horizontal tees) are used to split the cable path in two directions within the same plane, making them ideal for complex facility layouts.

Pricing Details

Material: Hot-dip galvanized steel is common for durability and corrosion resistance. Aluminum options are also available, which are lighter and resist corrosion.

Standard Length: Straight sections are usually 2.4 meters (approximately 8 feet) long, and pricing is often based on this standard length.

Fittings: Horizontal four-way fittings are priced per piece. Based on typical supplier data, a galvanized four-way horizontal fitting can cost between \$50 and \$150, depending on width, height, and load capacity.

Suppliers: Major suppliers include Grainger, Legrand, McMaster-Carr, and local distributors like Traytek. Prices may vary by region and availability.

Additional Considerations

Accessories: Covers, splices, and supports may be required and are priced separately.

Customization: Larger widths or heavy-duty versions may increase the cost.

Bulk Orders: Purchasing in bulk often reduces the per-unit price. For accurate pricing, it is recommended to contact suppliers directly with the specific dimensions and material requirements of your four-way horizontal cable tray. This ensures the quote reflects current market rates and shipping costs.
