

Price of outdoor distribution box backplate

AI Overview

Outdoor distribution box backplates typically range from \$20 to \$100 depending on size, material, and NEMA rating. Pricing Overview Amazon listings for outdoor electrical boxes with removable backplates suggest that the backplate is included with the enclosure, and the total price for a medium-sized NEMA-rated metal enclosure is around \$50-\$80. McMaster-Carr offers standalone electrical enclosure backplates, including solid and perforated panels, with prices generally starting at \$20-\$40 for smaller steel or aluminum panels and increasing for larger or stainless steel options. RSP Supply provides industrial backplates and subpanels, with prices varying based on material (painted steel, galvanized steel, stainless steel, aluminum, fiberglass) and size. Typical backplates for outdoor enclosures are in the \$30-\$100 range depending on customization and environmental rating. Factors Affecting Price Material: Stainless steel and powder-coated steel are more expensive than painted or galvanized steel. Aluminum and fiberglass options may also cost more due to corrosion resistance. Size: Larger backplates for bigger enclosures or multi-component setups increase the cost. NEMA/IP Rating: Backplates designed to maintain high NEMA or IP ratings for outdoor use (weatherproof, dustproof, UV-resistant) are priced higher. Pre-drilled or Perforated Panels: Panels with pre-drilled mounting patterns or perforations for DIN rails and terminal blocks may add to the cost. Recommendations For DIY or small-scale installations, a standard steel backplate included with a medium NEMA enclosure from Amazon is cost-effective (~\$50-\$80). For industrial or high-durability applications, purchasing a standalone stainless steel or galvanized backplate from McMaster-Carr or RSP Supply ensures proper fit and environmental protection, with prices ranging from \$30 to \$100 depending on specifications. By considering mater...
