

Swedish Mesh Cable Tray Price Inquiry

AI Overview

Swedish wire mesh cable trays typically cost between \$10 and \$25 per meter, depending on material, coating, and supplier. Wire mesh (basket) cable trays are among the most affordable cable management solutions, ideal for lightweight cables such as internet or data lines in offices and data centers. The price varies based on the material: pre-galvanized steel is the cheapest, hot-dip galvanized steel is more durable and slightly more expensive, aluminum is lightweight but pricier, and stainless steel is the most expensive, used in highly corrosive or hygienic environments. In Sweden, suppliers like RS Components and Ahlsell offer a range of cable trays, including mesh types, with lengths typically around 2-3 meters for easy handling. Bulk orders or project-based purchases can reduce the per-meter cost. Additional factors affecting the total cost include installation labor, shipping, and any custom coatings or finishes. For budgeting purposes, a standard pre-galvanized wire mesh tray in Sweden can be expected to cost roughly \$10-\$15 per meter, while aluminum or stainless steel options may range from \$20-\$50 per meter. Choosing the right material depends on the environment, load requirements, and longevity expectations.
