

The main power line to the distribution box is too short

Overview

The wire must be able to come out beyond the surface of the box at least 3". You will need to reroute these cables to a different junction box somewhere the wiring is able reach with the needed spare length inside the box. Can the main cables from the house be spliced inside the box in order to reach the lugs?

Can you find/buy a different (?)

bigger) meter box with lugs. In this video I show you numerous ways to fix wires that are too short in an electrical box. This one of the most common mistakes when running electrical wires that are made by not just DIYers but also some pros. But with some easy fixes they can be brought into a safe and code compliant stat In. The hot wire is way too short to even be inside of a junction box. I tried and all it did was pull the box downward.
