

The world s second-largest optical module supplier

AI Overview

Coherent (Finisar) is the world's second largest optical module company. In 2023, Coherent, which acquired Finisar, ranked as the second largest global optical module supplier, following Innolight, which held the top position. Coherent has a strong presence in the optical communication market, particularly in telecommunications, and has historically been a major player in high-speed optical transceivers and modules used in data centers and network infrastructure.

Market Context The optical module industry has seen significant growth due to the increasing demand for high-speed data transmission, cloud computing, and AI-driven applications. Leading companies focus on products such as 100G, 200G, 400G, and 800G optical modules, serving both data center and telecom markets. Coherent (Finisar) maintains a strong portfolio in these segments, particularly in coherent modules and high-speed transceivers.

Global Competitors The top global optical module suppliers in 2023 include: Innolight – Ranked 1st, leading in datacom optical modules and high-speed 400G/800G products. Coherent (Finisar) – Ranked 2nd, strong in telecom optical modules and coherent solutions. Huawei – Ranked 3rd, with a focus on domestic and international telecom markets. Cisco (Acacia) and Marvell – Other notable overseas competitors. Chinese companies have increasingly dominated the market, occupying seven of the top ten positions in 2023, reflecting the growing competitiveness of domestic optical module manufacturers.

Summary Coherent (Finisar) holds the position of the world's second largest optical module company, with a strong focus on high-speed optical modules for telecom and data center applications. Its ranking reflects both its historical market presence and ongoing contributions to the global optical communication industry.

The latest ranking of the TOP10 global optical module suppliers ...

A few days ago, LightCounting, a well-known market research organization in the optical communication industry, released the latest market report and updated the TOP10 ranking of global

Optical Transceiver Companies

Cisco Systems, Inc. offers optical transceiver modules used in various networking applications, ranging from campus to data centers to service provider networks. Its pluggable optics innovation,

10 companies in the optical transceiver industry chain 2024

To help you choose the best partner, this article will analyze and introduce 10 companies in the optical transceiver industry chain for you.

OSFP Optical Module Market: Key Growth Drivers Analyzed

The overarching trend points towards an increasingly interconnected and data-intensive world, solidifying the critical role of the OSFP Packaged Optical Module Market in enabling future digital

LightCounting :: The TOP10 Transceiver Suppliers for 2024

The figure below illustrates the changes in the TOP10 list of optical transceiver suppliers over the last 15 years. A majority of the Japanese and US-based suppliers exited this market by 2020, while Chinese

Optical Component Startup Tracker

The number of venture-backed optical component startups has exploded - the Optical Component Start-Up Tracker identifies these companies and their value propositions.

Data Center Optical Transceiver Market Size, Share, Trends

The global data center optical transceiver market was valued at USD 9.2 billion in 2025 and is projected to reach USD 21.3 billion by 2032, advancing at a compound annual growth rate (CAGR) of 12.9%

ITPro Today, Network Computing, IoT World Today combine

Top 10 Leading Companies in the Global Optical Transceiver Industry

A rising force in high-speed optical interconnects, INNOLIGHT has become a key supplier to hyperscale cloud companies across the globe. Known for rapid product development and

LightCounting :: May 2025 Optical Vendor Landscape

This report takes a deeper look at suppliers of optical components and modules, providing market shares of leading vendors sorted into several categories (top 3, top 4-6, top 7-10, and other vendors).

Global Optical Module Suppliers TOP10 Ranking Changes

Overall, the market share and ranking of Chinese optical module suppliers has gradually increased over the past few years, while the number of overseas suppliers has gradually decreased.

Chinese Optical Modules Own 7 of the Top 10 Seats. So Why Are

In the span of a decade, Chinese optical module companies have claimed 7 of the top 10 seats and secured core supplier status in the AI demand segment. Thanks to the 800G capacity

Latest Ranking Of Top 10 Global Optical Module Suppliers

The latest data shows that Xutron Technology and II-VI acquired Finisar, the leading optical module company, and tied for the first place in optical module market share in 2021, which is

Top 10 Global Optical Modules in 2023: Chinese Manufacturers

LightCounting stated that the above chart shows the changes in the TOP10 list of optical module suppliers over the past decade or so. By 2018, most Japanese and American manufacturers

10 companies in the optical transceiver industry chain 2024

The rapid development of AIGC has promoted the demand for 800G optical modules, and the entire industrial chain involving optical components,

Global rankings of optical module chips | Weyland

Zhongji InnoLight is recognized as the world's largest pure optical transceiver supplier, rapidly leading the market in high-speed modules (800G and 1.6T). Strong revenue growth is driven

Global insights from the largest optical module supplier

The optical networking market is in a peculiar situation. While manufacturing facilities have closed during the global coronavirus pandemic, the

Global Optical Module Suppliers TOP10 Ranking Changes

Looking at the recently released 2023 Global Optical Module TOP10 list, Chinese companies even occupy seven seats, with Xutron Technology ranking first for the first time and

Optical Modules Market Research Report 2034

The optical modules industry is undergoing a decisive technology inflection driven by several concurrent forces. First, the explosive growth of generative AI and large language model (LLM) inference

Top 10 Optical Module Manufacturers' Annual Reports! Highest

By 2025, its 800G optical module shipments will exceed 5 million units, making it the global "shipment champion" in the optical module industry, demonstrating significant economies of scale.
