

Western AI joins the server

AI Overview

Western AI is now part of both a national AI research server grid and an active community Discord server for collaboration and learning. Participation in the Distributed Research Grid Western University has joined the Distributed Storage and Compute Grid, a pilot project led by the Digital Research Alliance of Canada, which hosts powerful servers to support AI research. This infrastructure allows Western researchers and collaborators from other institutions to access up to 30% of the system's capacity, providing enhanced computational power, storage, and speed for AI projects. The servers are integrated into Western's existing infrastructure, enabling secure, modern, and scalable research capabilities. Western AI Community Server In addition to the research grid, Western AI maintains a community Discord server where students, developers, and AI enthusiasts can connect, collaborate, and participate in projects. The server supports networking, sharing of resources, and engagement in events such as hackathons, workshops, and AI case competitions. Members can also gain opportunities to contribute to research papers and present at conferences like the Canadian Undergraduate Conference on Artificial Intelligence (CUCAI). Opportunities and Activities Western AI organizes a variety of educational, social, and competitive events on campus. These include: Large-scale AI events and hackathons Workshops and speaker series Machine learning project development for industry presentation Creative and design initiatives to promote AI awareness Educational resources to build technical skills Students and researchers joining the server can benefit from mentorship, collaboration, and access to both cutting-edge AI infrastructure and a vibrant AI community. How to Join Interested individuals can join the Western AI Discord server via the invite link: <https://discord.gg/u6MStSStB7> to participate in discussions, projects, and events. This provides a direct way to engage with the AI community at Western University a...
