

What is the terminal box provided with the broadband

Overview

The box on your wall is called an Optical Network Terminal, or ONT for short. It's a small piece of equipment installed by Openreach, the company that owns and maintains the UK's broadband network, and it acts as the entry point for your Full Fibre broadband connection. It belongs to Openreach, not your provider, and not you, and in almost all cases, it should stay exactly where it is. The box was installed when Full Fibre. An ONT is a device that translates light signals sent through fiber optic cables into data that your devices can understand and use. What do the lights on the Openreach fibre. You'll typically find an Optical Network Terminal (ONT), or fiber box, in a central part of your home, like on the outside of your home, in your garage or even in a closet, and it plays a vital role in bringing fiber internet to your household via your internet service provider. In simple terms, its primary job.
