

What to do if the building s electrical distribution box loses power

Overview

One of the first steps to take in an electrical emergency is to disconnect the power source to prevent further damage or injury. Why has the power gone off in the house but only in part of it?

Why do my breakers keep tripping?

Can I reset a GFCI outlet myself?

What should I do if there's a total. Whether it's a sudden power outage, sparks from an outlet, or a dangerous electrical fire, your electrical emergency response in those crucial first moments can make all the difference. Quick action can mitigate damage, prevent injuries, and restore safety to your home or business. They examine burnt or blown fuses and assess wires for wear and tear. Testing each light switch also ensures there are no issues such as circuit overload or short circuit. An electrical panel, sometimes referred to as a breaker box, serves as the central hub that distributes electricity throughout your home. You suddenly notice the lights go out or your appliances stop working.
