

Where is the optical splitter factory in Peru

AI Overview

There is no publicly documented optical splitter factory in Peru; most splitters are imported and distributed by local companies. Currently, companies like Fibermax and Fiber Solutions operate in Peru, providing optical splitters and related fiber optic equipment, but they primarily import these products rather than manufacture them locally. Fibermax offers PLC splitters for PON and FTTX networks, emphasizing quality and reliability, while Fiber Solutions specializes in complete fiber optic solutions for telecommunications. For businesses seeking optical splitters in Peru, the practical approach is to contact local importers and distributors. ExportGenius lists Peruvian importers of optical splitters, including shipment details, quantities, and suppliers, which can help identify potential partners for procurement. If local manufacturing is a priority, it may be necessary to explore custom assembly or OEM partnerships with international manufacturers, such as Langzhi in China, which produces GPON/EPON equipment and can ship globally. In summary, while Peru has a market for optical splitters, production is not currently established locally, and most supply comes from imported products distributed by Peruvian companies.
