

Wired routers have fiber optic interfaces

AI Overview

Top wired fiber optic routers combine multi-gig Ethernet ports, LAN aggregation, and Wi-Fi 6/7 support to maximize fiber internet speeds. Key Features to Look For When choosing a wired router for fiber internet, consider the following:

- Multi-Gig Ethernet Ports:** Routers like the Netgear Nighthawk RS700S and ASUS RT-AX86U Pro offer 2.5G or 10G LAN/WAN ports, allowing you to fully utilize gigabit and multi-gigabit fiber plans.
- LAN Aggregation:** Some routers support combining multiple LAN ports to increase wired throughput, reaching speeds up to 2 Gbps on compatible devices.
- High-Performance CPU and RAM:** A strong processor (e.g., 2.6 GHz quad-core) and sufficient RAM (2 GB or more) ensure stable performance for multiple wired connections.
- Advanced Security:** Built-in security features like AiProtection provide protection without subscription fees.
- Device Capacity:** High-end routers can handle 100-200 devices simultaneously, ideal for large homes or offices.

Recommended Wired Fiber Routers

- Netgear Nighthawk RS700S:** Wi-Fi 7 support, 10G WAN/LAN, four 1G LAN ports. Covers up to 3,500 sq. ft. and supports up to 200 devices.
- ASUS RT-AX86U Pro:** 2.5G Ethernet port, advanced gaming features. Handles multi-gig speeds up to 950 Mbps consistently. Excellent stability for 20+ wired devices simultaneously.
- NETGEAR Tri-Band Wi-Fi 7 Router:** 2.5G internet port, tri-band design reduces congestion. Ideal for multi-story homes with multiple wired connections. Supports high-speed streaming and gaming without lag.
- TP-Link Archer AX55/AX90:** Budget-friendly options with reliable wired performance. AX90 balances price and performance, AX55 suitable for smaller homes. Supports multi-gig fiber plans with 1-2 Gbps wired speeds.

Tips for Optimal Wired Performance

- Use Cat6a or Cat7 Ethernet cables to ensure full multi-gigabit speeds.
- Connect high-demand devices directly to the router's multi-gig ports for gaming, streaming, or NAS access.
- Enable LAN aggregation if supported to combine ports for faster wired throughput.
